

# Matt Oshinowo

What is your job title?

PhD Student Researcher

Who do you work for?

University of Bath:  
Centre for Sustainable and  
Circular Technologies

What do you do?

I do research into how we can make batteries safer and from more sustainable materials. This is so that we can work towards 100% renewable energy production.

— — —

**“I am inspired by scientific advancements,  
improving quality of life,  
charitable work and **progressiveness.**”**

## What skills do you think are important when dealing with climate change at work?

---

“I got into this work because of my interest in sustainable technologies and my desire to help create them.

Important skills include compassion, open-mindedness, and a **pragmatic** approach to solutions.”

**“I would also like to see animal agriculture eradicated for the benefit of the environment (and the animals of course!)”**
