

# Rosie Buzova

What is your job title?

Graduate Process Engineer

Who do you work for?

Atkins Ltd

What do you do?

“I work within the Net Zero Energy business, so I am involved with projects that reduce greenhouse gas emissions from sites such as those that generate electrical power. We also investigate alternative energy solutions, as well as ways to increase efficiency and reduce demand.”

— — —

**“I believe that small, everyday acts can change our attitudes and behaviours, and rewire the way we see natural resources.”**

## What can you recall learning at school which helps you with your job now?

“The Maths and Chemistry I learned at school are relevant to what I do now, as is knowing how to use Microsoft Excel!”

A basic knowledge of the sciences is relevant to almost all professions, as they all have a climate change aspect.”

**“My company is embracing more sustainable working habits by encouraging the use of public transport and letting us work from home.”**
